# Care for Older People

Live-in care becomes a perfect alternative to residential care, especially if your loving person wants to age in familiar environment. Our service users value the high level of live-in care we provide. It includes our help in getting up, preparing breakfast, getting dressed etc. It's natural to want to stay at home as you grow older. However, taking a step back to look at the big picture can help you decide whether staying at home for the long term truly is the right step for you. Take a look at your options, your budget, and some of the alternatives.

Our company is committed to developing innovative programs and expanding services, such as providing transportation for our nurses to enable us to serve hard-to-reach areas and a shopping service for our patients who are unable to shop for themselves.

Our goal is to enable the physically challenged, the elderly in need, the patient recovering from an illness or accident, and others confined to their homes to maintain their independence.

Education of our entire staff is constant through our special in-service courses. Our commitment to excellence continues through our comprehensive curriculum, skills validation, and mandatory continuing education program.

## Why choose us

Livingstone Health Care's commitment to excellence begins with pre-hire screenings and background checks. Our rigid application process allows us to be selective. To meet the unique needs of our culturally diverse region, our agency employs numerous carers who are bilingual.

We believe that everyone deserves to be treated with dignity and respect and that their emotional and mental well-being are significantly important. You may be looking for care for a friend, relation or just planning your own future. At home, our service users can continue their life as normal as possible, in dignity and surrounded by their own valuable things.

Patient satisfaction is our first priority. We will never send anyone to your home that would not be welcome in ours. Our personnel has the appropriate certificates, licenses and experience to provide personalized care.
